

UKURAN SUDUT

TUJUAN PEMBELAJARAN

Siswa diharapkan mampu :

- ☒ Memahami konsep pengukuran sudut dalam derajat dan radian
- ☒ Mengubah ukuran sudut dari derajat ke radian atau sebaliknya

Materi Kelas

1

Satuan Derajat
Satuan Radian

2

Hubungan Derajat
dan Radian

3

Contoh Soal dan
Pembahasan

Satuan Derajat

1 putaran = 360° yang berarti bahwa $1^\circ = \frac{1}{360}$ putaran

PENGUKURAN SUDUT

- Ukuran radian

$$\angle AOB = \left(\frac{\text{panjang busur } AB}{\text{Jari - jari } r} \right) \text{radian}$$

Secara matematis ditulis

$$\theta = \left(\frac{S}{r} \right) \text{radian}$$

$$1 \text{ radian} = \frac{180^\circ}{\pi}$$

Darimana?

$$1^\circ = \frac{\pi}{180} \text{ radian}$$

Satuan Radian

Satuan Radian adalah salah satu satuan yang diartikan sebagai besar ukuran sudut pusat (tetha) yang panjang busurnya sama dengan jari-jari. Dan disimbolkan dengan 'rad'.

$$360^\circ = 2\pi \text{ rad} \text{ atau } 1^\circ = \frac{\pi}{180^\circ} \text{ rad} \text{ atau } 1 \text{ rad} = \frac{180^\circ}{\pi} \cong 57,3^\circ$$

$$\frac{180}{\pi} = \frac{1 \text{ radian}(rad)}{1 \text{ derajat}(\circ)}$$

Sehingga

$$1 \text{ radian} = \frac{180^\circ}{\pi}$$

$$1^\circ = \frac{\pi}{180} \text{ radian}$$

Hubungan antara Derajat dan Radian

1. Mengubah Bentuk Derajat ke Radian

- Konversi x derajat ke *radian* dengan mengalikan $x \times \frac{\pi}{180^\circ}$.

$$\text{Misalnya, } 45^\circ = 45^\circ \times \left(\frac{\pi}{180^\circ} \right) \text{rad} = \frac{\pi}{4} \text{rad}.$$

2. Mengubah Bentuk Radian ke Derajat

- Konversi x *radian* ke derajat dengan mengalikan $x \times \frac{180^\circ}{\pi}$.

$$\text{Misalnya, } \frac{3}{2} \pi \text{rad} = \frac{3}{2} \pi \times \frac{180^\circ}{\pi} = 270^\circ.$$

$$1 \text{ putaran} = 360^{\circ} = 2\pi \text{ rad}$$

$$1) \frac{3}{2} \text{ put} = \dots^{\circ} = \dots \text{ rad}$$

$$\frac{3/2}{1} = \frac{x}{360^{\circ}}$$

$$\frac{3/2}{1} = \frac{x}{2\pi}$$

$$1 \cdot x = \frac{3}{2} \cdot \cancel{360^{\circ}}$$

$$1 \cdot x = \frac{3}{2} \cdot \cancel{2\pi}$$

$$x = 540^{\circ}$$

$$x = 3\pi \text{ rad}$$

$$\frac{3}{2} \text{ put} = 540^{\circ} = 3\pi \text{ rad}$$

$$2) 150^{\circ} = \dots \text{ put} = \dots \text{ rad}$$

$$\frac{\cancel{150^{\circ}}}{\cancel{360^{\circ}}} = \frac{x}{1}$$

$$\frac{\cancel{150^{\circ}}}{\cancel{360^{\circ}}} = \frac{x}{2\pi}$$

$$\frac{5}{12} = x$$

$$\frac{5}{12} = \frac{x}{2\pi}$$

$$12 \cdot x = 5 \cdot 2\pi$$

$$12x = 10\pi$$

$$x = \frac{\cancel{10\pi}}{\cancel{12}}$$

$$= \frac{5\pi}{6} \text{ rad}$$

$$150^{\circ} = \frac{5}{12} \text{ put} = \frac{5\pi}{6} \text{ rad}$$

$$3) \frac{7\pi}{6} \text{ rad} = \dots \text{ put} = \dots^{\circ}$$

$$\frac{7\pi/6}{2\pi} = \frac{x}{1}$$

$$\frac{7\pi/6}{2\pi} = \frac{x}{360^{\circ}}$$

$$2\pi \cdot x = \frac{7\pi}{6} \cdot 1$$

$$2\pi \cdot x = \frac{7\pi}{6} \cdot \cancel{360^{\circ}}$$

$$2\pi x = \frac{7\pi}{6}$$

$$2\pi x = 420^{\circ} \pi$$

$$x = \frac{\cancel{7\pi}}{\cancel{2\pi} 6}$$

$$x = \frac{\cancel{420^{\circ}\pi}}{\cancel{2\pi}}$$

$$x = \frac{7}{12} \text{ put}$$

$$x = 210^{\circ}$$

$$\frac{7\pi}{6} \text{ rad} = \frac{7}{12} \text{ put} = 210^{\circ}$$

Sudut Istimewa yang Sering digunakan

Derajat	Radian	Derajat	Radian
0°	0 rad	90°	$\frac{\pi}{2} \text{ rad}$
30°	$\frac{\pi}{6} \text{ rad}$	120°	$\frac{2}{3}\pi \text{ rad}$
45°	$\frac{\pi}{4} \text{ rad}$	135°	$\frac{3\pi}{4} \text{ rad}$
60°	$\frac{\pi}{3} \text{ rad}$	150°	$\frac{5\pi}{6} \text{ rad}$
180°	$\pi \text{ rad}$	270°	$\frac{3\pi}{2} \text{ rad}$
210°	$\frac{7\pi}{6} \text{ rad}$	300°	$\frac{5\pi}{3} \text{ rad}$
225°	$\frac{5\pi}{4} \text{ rad}$	315°	$\frac{7\pi}{4} \text{ rad}$
240°	$\frac{4\pi}{3} \text{ rad}$	330°	$\frac{11\pi}{6} \text{ rad}$

Kuadran Sudut

a. Sudut baku dan sudut koterminal

b. Besar sudut pada setiap kuadran

LATIHAN

Ubahlah sudut di bawah ini ke dalam bentuk radian!

$$1.30^\circ$$

$$2.60^\circ$$

$$3.90^\circ$$

$$4.120^\circ$$

$$5.240^\circ$$

LATIHAN

Ubahlah sudut di bawah ini ke dalam bentuk derajat!

- a. $\frac{1}{3}\pi rad$
- b. $\frac{7}{9}\pi rad$
- c. $\frac{3}{4}\pi rad$
- d. $\frac{11}{12}\pi rad$
